**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Part III DETAILED ACTION**

*Notice to Applicant(s)*

1. This action is responsive to the following communications: amendment filed on 6/14/04.
2. This application has been reconsidered. Claims 1-10 are pending.

*Claim Rejections - 35 USC § 102*

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

4. Claims 1, 2, 3, 4, 5, 6, 7, 8, 9, and 10 are rejected under 35 U.S.C. 102(e) as being anticipated by Gase (U.S. 6,184,996).

With respect to claims 1, 4, 6, 7, and 8, Gase discloses a printer (14) connected to a network, comprising: a memory (26) for storing a program; a processor (32) for executing the program; and a print engine for executing printing on a print record medium (column 3, lines 24-

30), wherein according to the program, the processor receives from a computer a print request (URL) (column 3, lines 6-23), including a request to a peripheral device to acquire print data (column 3, lines 6-30); sends the acquisition request to the peripheral (column 3, lines 13-23); and causes the print engine to print on the basis of the print data sent from the peripheral device in response to the acquisition request (column 3, lines 24-30).

With regard to claims 2 and 5, Gase discloses to the response to a given transfer request sent from the computer, the processor sends page data, which composes a print acceptance screen for sending the print request, to the computer (column 3, lines 37-51).

With respect to claim 3, Gase discloses the acquisition request includes a specified condition for the peripheral device to acquire the print data (which reads on a URL) (column 3, lines 13-23).

With regard to claims 9 and 10, Gase discloses a printer (14) connected to a network, comprising: a memory (26) for storing a program; a processor (32) for executing the program; and a print engine for executing printing on a print record medium (column 3, lines 24-30), wherein according to the program, the processor sends page data, which composes a print acceptance screen for sending the print request, to the computer (column 3, lines 37-51) receives the print data that a peripheral device acquires and sends in response to a print request as the computer sends the print request to the peripheral device, the print request including a request to acquire the print data on the basis of the print acceptance screen (column 3, line 12 to column 4, line 64), and causes the print engine to print on the basis of the print data sent from the peripheral device in response to the acquisition request (column 3, lines 24-30).

*Response to Arguments*

5. Applicant's arguments with respect to claims 1-10 have been considered but are moot in view of the new ground(s) of rejection.
